Maxon Signs TecNet International, Inc. For US Distribution

TecNet Adds US to Latin American Market Channels

In Seoul South Korea Maxon CIC Corp. and TecNet International, Inc. completed and signed an agreement to give TecNet International exclusive distribution in US markets. This adds new market channels to an existing agreement for Central and South America with Maxon CIC. TecNet will market and distribute all of Maxon CIC existing and future LMR products as well as select consumer and other products in US markets.

TecNet had been serving as interim distribution, parts support, and warranty service for Maxon CIC for two years before the two companies reached contractual agreement. Mr. Scott Ahn, President and CEO of TecNet was ecstatic about the opportunity to pursue a more robust market strategy in the US market. The company had been serving customers as required without authorization to actively sell in the market. "It will be gratifying to fully extend our marketing efforts in the US. We look forward to significant additional opportunities with the Maxon product line."

Headquartered in Lenexa, Kansas, the TecNet International management team is comprised of Scott Ahn, President, Kirby Wendler, International and US National Sales Manager, and Brad Parkins Technical Support Manager. In business for over 10 years, TecNet International Inc. specializes in the marketing and distribution of Wireless Data and Wireless Voice Communication products to North, Central, and South American markets.
